Final Project Report Evaluation Criterion

Sections	Weighting
• Title • Author • Abstract: Around 100 words • Key words: 3- 5	10%
Introduction • Clearly introduce problems • Clearly describe the experiment (or survey), data resource and data • Cleary state objective/questions to answer	20%
Method • Clearly introduce methods to use. If the methods were taught in this course, you can still introduce them in your own language. If the methods were not taught in this course, give more details and references. • Appropriate for data • Thorough and Complete • Creative	20%
Results • Clearly interpret results • Figures/tables should include detailed captions. • Figures are clear (use colors and various types of lines to improve the visualization) • Tables are well organized • Explain the reasons for surprising results (if there is any) and explore solutions • Figures and Tables can be either put within the main body of the report or at the end of the report.	20%
Conclusions and Discussion • Clearly state if your objective/questions have been addressed or not • Summarize substantive issues • Completely discuss limitations and future work	10%
Reference • Cite correctly to avoid plagiarism (https://www.lib.sfu.ca/help/academicintegrity/plagiarism) • The reference list should be located at the end of the main report	5%
Overall • Well written (grammar, spelling) • Well organized and structured • 3<=Pages <=6 without figures and tables	15%
